Roadmap for a Sustainable Solana Utility Token

PROJECT VISION

Our goal is to demonstrate the power of utilizing crypto currency as a store of value and provide the Solana blockchain with a project that consistently rewards its community.

By leveraging Pump Fun for an initial launch, we maximize earning potential for the small investors and true believers in the long-term mission.

We want to create a token that investors can put money into and be confident that they can leave it unattended for hours or days without getting rugged.

TOKENOMICS

Total Supply: 1B \$DHS tokens

Giveaway Wallet (20%): 200 giveaways throughout the market cap value range \$500K to \$1B

Airdrop Wallet (10%): Community airdrops beginning at \$100M market cap

Burn Wallet (5%): To be held as a store of value until \$1 Billion Dollar market cap then begin burning 1% at key milestones

Public Circulating Supply (50%): Open for trading and organic price discovery

Company Wallet (5%): To be responsibly traded at the discretion of BBWG Corporation

DEV Wallet (10%): Developer allocation with conservative sell plan to ensure minimal price impact

*The Burn wallet, the DEV wallet, and Company Wallet are ineligible to receive funds from the Community Wallets

GIVEAWAY WALLET

The giveaway wallet will be utilized to reward investors for their timely entries and commitment to hold. To qualify for a giveaway, wallet addresses must hold at least 50% of its initially bought tokens at the time the winners are selected. There will be four winners per give away. Community members that fit the criteria will be awarded 250K DHS tokens per giveaway, selected at the \$DHS market cap valuations in the table below. Token distribution will occur within 24 hours of the market cap being achieved. This process will continue from \$500K through 1B market cap.* If the Market Cap values are not achieved within one year, then the remaining tokens will be burned. The Estimated Value in the table below is the value of 1M tokens at the specified Market Cap and may be more or less at the time of token transfer.

The Give Away (Est) below is to be divided by the 4 winners per Give Away

AIRDROP WALLET

To qualify for an airdrop, your associated wallet address must hold at least 50% of its initial investment with the awarded amount being distributed based on the amount of tokens held.

Airdrop Schedule				
Airdrop #	% of Supply	Market Cap Value for Airdrop	Investor Eligibility Entry Market Cap Value	Airdrop Value
1	1%	100M	Pump Fun investors	\$1M
2	2%	250M	<100M	\$5M

BURN WALLET

The Burn wallet is intended to illustrate the power of utilizing crypto currency as a store of value. BBWG Corporation intends to demonstrate what can happen with a small investment and a dream. We are committed to burning 5% of the total supply (50M DHS tokens) for deflationary purposes. The Burn wallet will begin 1% burns at the market cap values in the table below. If the market cap values are not achieved within one year, then burns will commence in March 2026.

Burn Wallet Schedule	
MARKET CAP	Approximated burn value \$
\$1,000,000,000	\$10,000,000
\$2,000,000,000	\$20,000,000
\$3,000,000,000	\$30,000,000
\$4,000,000,000	\$40,000,000
\$5,000,000,000	\$50,000,000

THE DEVELOPER (DEV) WALLET

At the following market cap milestones, the DEV wallet will sell 0.2% DHS tokens (2.0M) per transaction until the entire 10% of the supply is released back into the ecosystem. That is, one transaction the first time the following market cap values are hit in the table below. Through implementing a structured, responsible sell strategy, we minimize the risk of one transaction triggering a panic dump. The sell strategy the developer wallet will employ is as follows:

Dev Sell Schedule (0.2% per TXN)			
TXN #	MARKET CAP	TXN #	MARKET CAP

FINAL THOUGHTS

This is not just another memecoin. It is a long-term value store with real-world integration into billion-dollar industries. By combining structured tokenomics, responsible selling, and real utility, we are creating something that degenerate traders and institutional investors alike can believe in. Now, the question should not be if you should invest—it is how much you are willing to hold for the long haul.

TL;DR ape and forget
